

Solutions for Perfection from Marin Industrietechnik

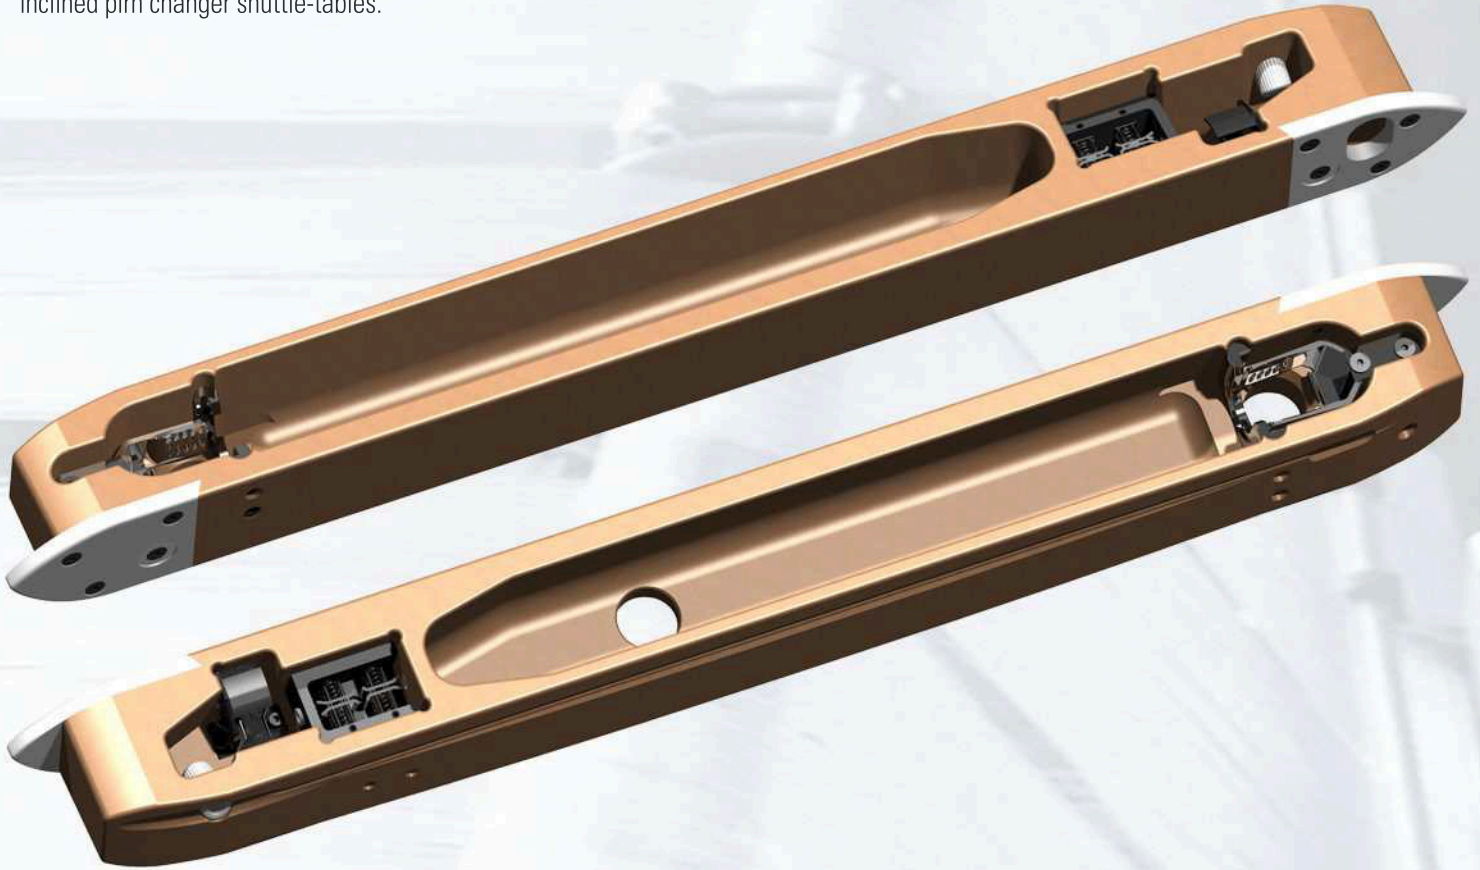

## Heavy Weight Weaving Shuttles BLK

- *10-15 % Higher productivity utilization*
- *Cost reduction due to long life materials*
- *Cost saving due to modular construction*
- *No weaving marks on the fabric*

## Weaving Shuttles Type BLK

High-Tec Shuttle type BLK, with polished sliding skirts and full equipment. Application: Felt weaving looms with HPIII hydraulic insertion system, equipped with an automatic pirn changer on the left side of the loom. Could also be used at looms with manual pirn change and rectilinear or inclined pirn changer shuttle-tables.

### Full equipment:

2 Ceramic eyelets, 1 Shuttle nose type BLL, 1 Shuttle nose type BLR, 2 Sensor plates type B, 1 Slide bow type B, 1 Clamping spring  
1 Pirn holder type A, 1 Yarn cutter type B, 1 Filling brake type B and all screwing connections.

### Shuttle dimensions:

750/700 x 80 x 67/58 mm

Option: Could be equipped with 3 types of pirn clamping units

Typ A

Typ B

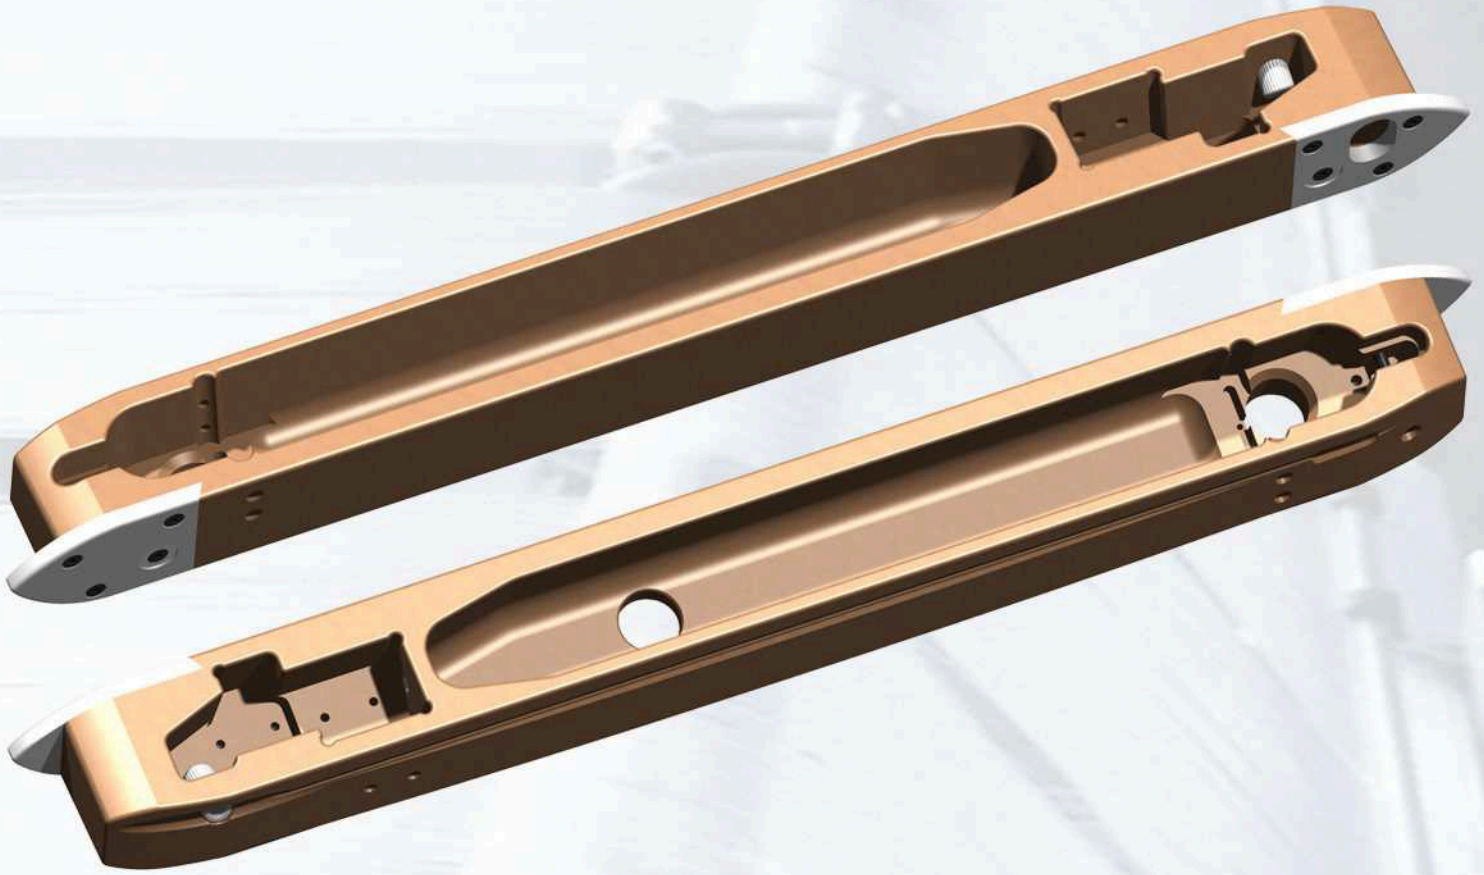

Typ C

## Weaving Shuttles Type BLG

High-Tec Shuttle type BLG on the highest precision level with basic equipment.

### Basic equipment:

2 Ceramic eyelets, 1 Shuttle nose type BLL, 1 Shuttle nose type BLR, 2 Sensor plates type B, 5 locking nuts and 1 socket head cap screw for the clamping spring.

### Shuttle dimensions:

750/700 x 80 x 67/58 mm
