

Solutions for Perfection from Marin Industrietechnik

Heavy Weight Weaving Shuttles CRK-SS-N1

- *10-15 % Higher productivity utilization*
- *Cost reduction due to long life materials*
- *Cost saving due to modular construction*
- *No weaving marks on the fabric*

Weaving Shuttles Type CRK-SS-N1

High-Tec Shuttle type CRK-SS-N1, with polished sliding skids and full equipment. Application: At looms with mechanical picking system and manual pirn change. The sensor plates could be positioned to the customers' requirements at the front-side or back-side of the shuttle.

Full equipment:

2 Ceramic eyelets, 2 Steel tips, 2 Sensor plates type A, 1 Slide bow type C with Pirn chuck type Z, 1 Clamping spring, 1 Pirn holder type CS, 1 Yarn cutter type A, 1 Filling brake type B and all screwing connections.

Shuttle dimensions:

750/700 x 80 x 64/50 mm

Clamping spring with slide bow type C
and Pirn chuck type Z

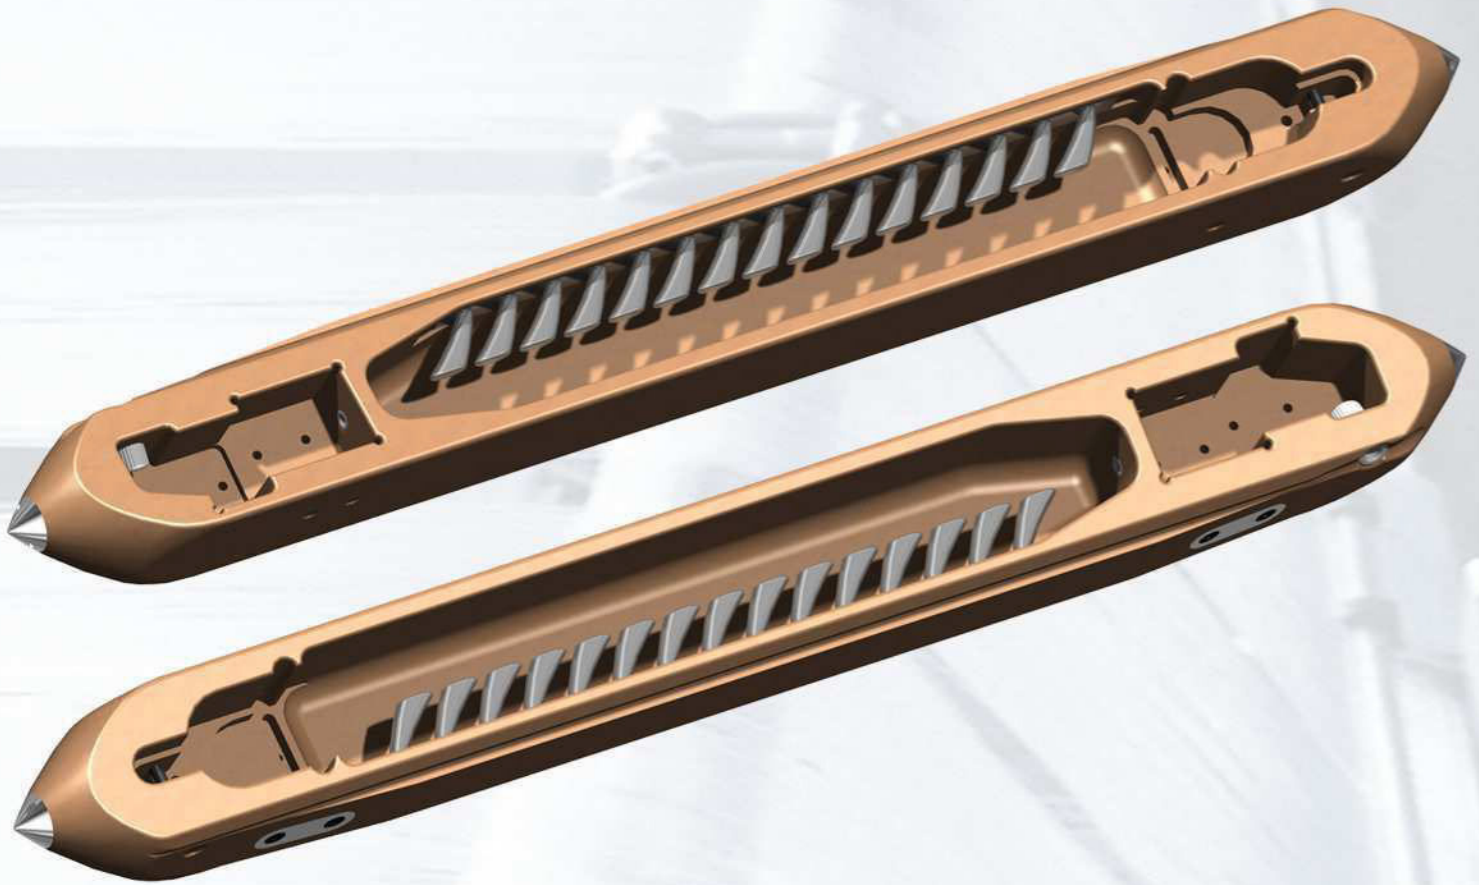

Pirn holder type CS

Weaving Shuttles Type CRG-SS-N1

High-Tec Shuttle type CRG-SS-N1 on the highest precision level with basic equipment.

Basic equipment:

2 Ceramic eyelets, 2 Steel tips, 2 Sensor plates type A, 5 locking nuts and 1 socket screw for the clamping spring. The Brush strip is individually integrated.

Shuttle dimensions:

750/700 x 80 x 64/50 mm
